Atirson Oliveira

Software Engineer

I've been a software engineer for 3 years working with development of systems web for different clients and during my experience I used many methodologies to manage a process like SCRUM, KABAN and XP. I work with AngularJS and ReactJS but I'm not limited only to this I can work with different frameworks to give the best possible solution for my clients. I wanna reach positions with more responsibility to share knowledge and achieve goals of the company.
